*WARNING it is AN OFFENCE
to DISTURB SURVEY MARKS*

To all Territorial Authorities, Services Providers, Construction and Survey Companies as well as the General Public.

Ascension Surveyors Limited is an accredited LINZ Geodetic Survey and Maintenance Provider.

WARNING it is AN OFFENCE to DISTURB SURVEY MARKS

Part 6 Section 55 of the Cadastral Survey Act 2002

Places the responsibility of reinstatement of all survey marks disturbed by construction or other works with the organisation or person(s) undertaking those works.

The Government Department LINZ

Requires all Datum 2000 marks affected in this way to be offset and reinstated or replaced to its specifications by an Accredited Survey Provider.

Although the LINZ Specifications allow Registered Surveyors to carry out the survey work where survey standards are concerned, they can be to the uninitiated daunting in terms of technical requirements and deliverables.

Don't Be Caught Out

Through underestimating the requirements, the consequences can be both costly and time consuming.

Let Us Help You

We can look after this important survey function for you. We have the specialist equipment and expertise gained through many years with Lands & Survey and DOSLI

Contact Us Now

For all your survey needs in terms of LINZ Specifications or any other requirements.
